# WEATHER OF CONCERN

## **Northern California**

- Heavier precipitation today and early Tuesday is in the forecast across northern California.
  - Rainfall rate are unlikely to reach critical thresholds; however, they cannot be entirely ruled out Monday night with thunderstorms across northern California.
  - [Flash Flood Watch will be in effect starting this afternoon through this evening for the Mendocino Complex Fire burn scar area.](#)
- Six to 12 inches of snow is expected across the northern and central Sierra mountains this morning through Tuesday afternoon.
  - Winter Storm watches and advisories are in effect.

## **Southern California**

- Minor coastal flooding is possible along the southern coastlines through today.
- Westerly winds will be gusting over 50 mph with some gusts over 60 mph along the desert slopes in San Diego County, the Antelope Valley, the Santa Barbara South Coast, the Santa Clarita Valley and mountain locations Tuesday morning.
- Gusty offshore winds are possible next Friday across southern California.

## **Active Weather Warnings, Watches and Advisories by County:**

- <http://www.wrh.noaa.gov/hazardSummary/?state=ca&bycounty=1>

# WEATHER SYNOPSIS BY REGION

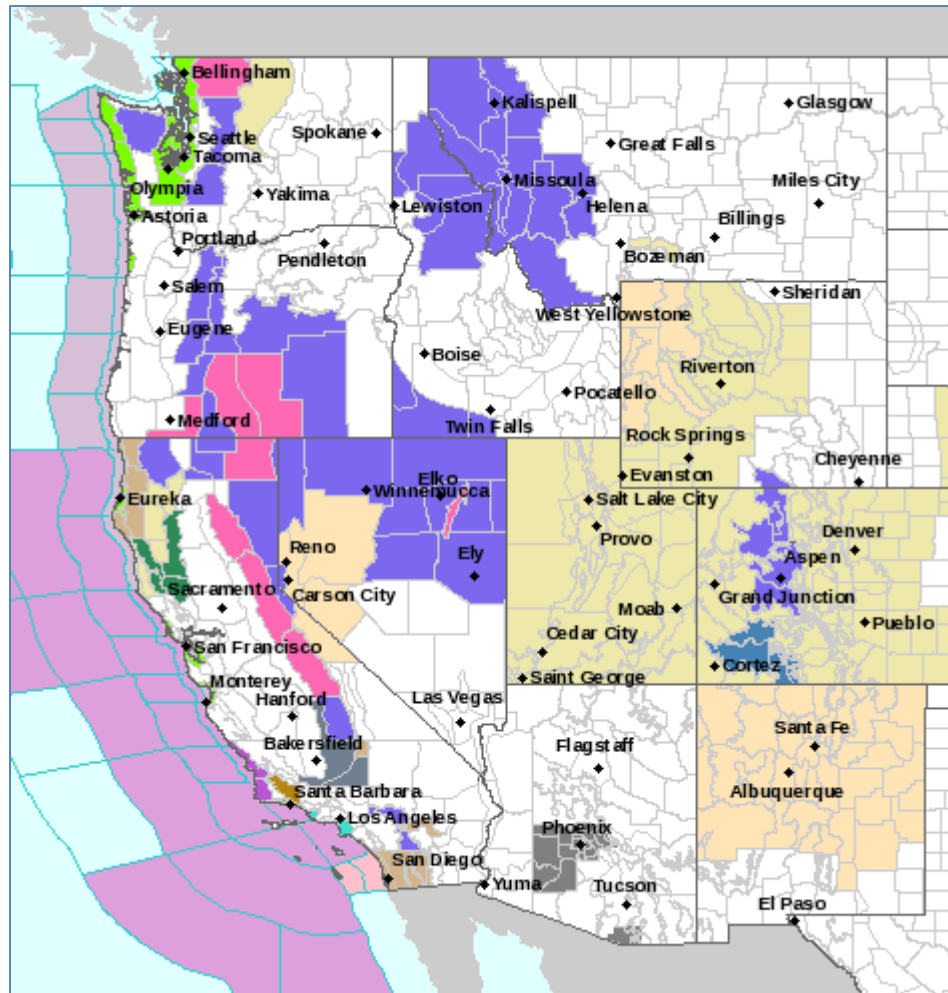

## **NORTHERN CALIFORNIA**

- Unsettled weather, due to a series of Pacific troughs, will continue through at least the middle of next week.
- Possible pattern shift to drier-warmer regime with occasional northerly wind events starting late next week although confidence only moderate at this time.
- Another round of wetting precipitation will continue through at least the middle of next week. Northern areas appear to be favored the most but weather models have jumped around a bit on projected precipitation totals.
- Snow levels will start out on the higher side, generally above 5000 feet, but should lower and drop as low as 3000-4000 feet early next week, especially favoring far northern and eastern areas.
- Periods of gustier wind flows will last through next week. Some drier, northerly flows possible next week, especially late week.

## **SOUTHERN CALIFORNIA**

- A pair of weak troughs will bring cool, breezy weather to the region over the next few days. Another chance of precipitation will occur this afternoon into Tuesday morning. Significant snow accumulations may occur from this second system from Tuolumne County northward. Light offshore flow may develop next Wednesday night, but temperatures are expected to remain quite cool next week.
- Cooler over the next few days with highs ranging from the 40s in the mountains to the mid 60s across the valleys of Southern California.
- Northwest winds of 15-25 mph with gusts to 45 mph this afternoon from the Kern County Mountains across the Mojave Desert.
- North winds of 20-30 mph possible Tuesday through the I-5 Corridor. Scattered showers will develop this afternoon before spreading southward into Southern California late tonight into Tuesday morning.
- Over a foot of snow will be possible above 4,000 feet in the Sierras from Tuolumne County northward. The rest of the area will see 0.25" – 0.33" of precipitation.
- Gusty northwest winds of 20-30 mph likely in the desert Tuesday afternoon. Winds weakening and shifting offshore Wednesday night. At this time, the offshore winds are expected to remain light.
